M.Adeel Hussain

Software Engineer (React Developer)

adeellinkind@gmail.com 03048487166 Lahore, Pakistan

Creative Web Developer | Building Responsive, User-Friendly Interfaces

Passionate about turning ideas into functional websites using HTML/CSS/JavaScript, React.js & SQL Proven ability to develop, maintain & enhance web application. Committed to continuous learning & contributing to high-quality code & modern development practices

Education

Nov 2021 - Apr 2025

BS Software Engineering

Islamia University Bahawalpur, Bahawalnagar Campus

- Studied core concepts in programming, data structures, algorithms, and software development life cycle (SDLC).
- Gained hands-on experience with modern technologies like HTML, CSS, JavaScript, React.js, PHP, SQL, and C#.
- Developed academic projects including web applications, desktop apps, and database-driven systems.
- Familiar with Agile methodologies, version control (Git/GitHub), and software engineering models (Waterfall, Agile, etc.).

Sep 2018 - Apr 2021

DAE in Electrical Engineering

Jinnah College Of Technology, Chishtian

- Gained in-depth knowledge of electrical circuits, power systems, machines, and industrial automation.
- Completed hands-on training in electrical wiring, troubleshooting, and maintenance.
- Learned to work with PLCs, transformers, motors, and electrical safety standards.

Experience

Sybrid Private Limited – A Lakson Group Company

Trainee Officer

Jul 2025 - Present

Skills

HTML

CSS

JavaScript

React J's

SQL

Certificates

Jun 2025 — CSS Crash Course for Beginners (Udemy)

May 2025 — Mastering React: React Crash Course with Mini Project (Udemy)

Feb 2025 — Hands on React J's from Beginner to Expert (Udemy)

Feb 2024 — CREATIVE WRITING (Digi Skills)

Feb 2024 — COMMUNICATION AND SOFT SKILL (Digi Skills)

Oct 2023 — Video Editing (Digi Skills)

Projects

React J's

Time Tracking Web App

Final Year Project

- Developed the frontend of a time tracking web application as part of a final year project.
- Built responsive UI components using React.js, styled with modern CSS techniques.
- Implemented features such as task timers, daily logs, and activity reports to monitor productivity.
- Focused on user-friendly design, real-time updates, and seamless navigation for efficient time management.
- Collaborated with backend developers to ensure proper integration and data flow.

React J's

Adeel Restaurant

Landing page Update or Maintenance Purpose

- Customized and enhanced an existing restaurant landing page by adding animations and improving color schemes for a modern UI.
- Fetched code from GitHub, analyzed the structure, and made performance and design improvements.
- Focused on revision practice, code maintenance, and applying creative updates to a live design.
- Strengthened understanding of frontend workflows, responsiveness, and web aesthetics.

.Net C#

ATM Management System

C# (Windows Forms), SQL Server

- Designed and developed a desktop-based ATM Management System using C# Windows Forms and SQL Server as the backend.
- Implemented key banking features such as user login, PIN verification, balance check, cash withdrawal, deposit, and transaction history.

.Net C#

Tic Tac Toe Game

Game developed using C# Windows Forms

- Designed an interactive GUI-based game where two players can take turns marking X and O on a 3×3 grid.
- Implemented core game logic for win/draw detection, turn switching, and game reset functionality.
- Applied programming concepts like arrays, conditions, and loops to manage game state and validate moves.
