Rabail Waqar

ML/NLP Engineer

Johar Town, Lahore| 0333-4554119 | rabail.waqar185@gmail.com | https://www.linkedin.com/in/rabail-waqar-612800236/

INTRODUCTION

Passionate Machine Learning Engineer with a deep focus on Natural Language Processing, offering hands-on experience in fine-tuning and deploying transformer-based models such as BERT, RoBERTa, and T5. Proven ability to execute end-to-end NLP tasks, including Sentiment Analysis, NER, and Text Summarization using PyTorch and Hugging Face. Enthusiast to contribute as an NLP/ML Engineer by developing intelligent and scalable AI systems with the use of Python, PyTorch, TensorFlow, and MLOps techniques. Experienced in the application of LLMs, embeddings, vector databases, and API-based AI systems with a special emphasis on model performance and the practical application of the same in the real world.

EDUCATION

University of Management and Technology — **Lahore, Pakistan**

Bachelor of Science in Computer Science (BSCS) — **Nov – 2021 – 2025**

- **CGPA:** 3.54
- **Courses:** Natural Language Processing, Artificial Intelligence, Machine Learning, Data Mining, Object-Oriented Programming, Web Development

Lahore College for Women University — **Lahore, Pakistan**

ICS Physics — **2019 – 2021**

- **Grade:** A+
- **Courses:** Computer Science, Mathematics, and Physics

EXPERIENCE

Self-Projects:

- **Final Year Project (POST GEN AI – Automatic Prompt Generator) –** An AI-driven Twitter blog automation tool that scrapes user tweets, extracts key themes using KeyBERT, and generates personalized blog posts using Llama 2 for both prompt and content generation. The system auto-publishes content, delivering a seamless, hands-free blogging experience.

- **Bias Mitigation in Toxic Text Classification (NLP / DL) –** Trained LSTM, BiLSTM, and Transformer models on 2M+ comment dataset to detect toxicity and reduce bias across identity subgroups using identity-weighted loss and balanced training. Best fairness achieved with Transformer + embedding.

Certificates

Full Stack Development – Python (TFT Trainings, 2022) – Learned the essential web development skills in HTML, CSS, and JavaScript, using PyCharm, and gained basic knowledge of React, Node.js, and database management.
